Dear Mr. Knight:

Re: POLYDEX BACTERIOSTATIC ALGAECIDE, Registration no. 23636

The registration of this control product, pursuant to Section 14 of the *Pest Control Products Regulations*, has been **renewed** for the registration period as indicated on the certificate of registration renewal, subject to the condition that the labels will be amended to correct the deficiencies noted on the attached labels. These corrections should be made at the next printing. It is not necessary to notify the Pest Management Regulatory Agency or submit labels when these corrections are made.

In order to avoid undue delays in the renewal process, your application has been processed based on label verification. The PMRA will verify the Statement of Product Specification Form (SPSF) submitted with your renewal application as a separate exercise. You will be notified in writing whether the SPSF is acceptable, or in the case where deficiencies are identified, the appropriate course of action to take in order to address them. Failure to respond to deficiencies could affect the regulatory status of the product.

This submission is now complete.

Sincerely,

F.M. Granville
